## INBRED MAIZE LINE PH726

Joseph Kevin Gogerty

### Abstract

5           An inbred maize line, designated PH726, the plants and seeds of inbred maize  
line PH726, methods for producing a maize plant, either inbred or hybrid, produced by  
crossing the inbred maize line PH726 with itself or with another maize plant, and hybrid  
maize seeds and plants produced by crossing the inbred line PH726 with another maize  
10   line or plant and to methods for producing a maize plant containing in its genetic  
material one or more transgenes and to the transgenic maize plants produced by that  
method. This invention also relates to inbred maize lines derived from inbred maize line  
PH726, to methods for producing other inbred maize lines derived from inbred maize  
line PH726 and to the inbred maize lines derived by the use of those methods.
